

Cloud Streamer

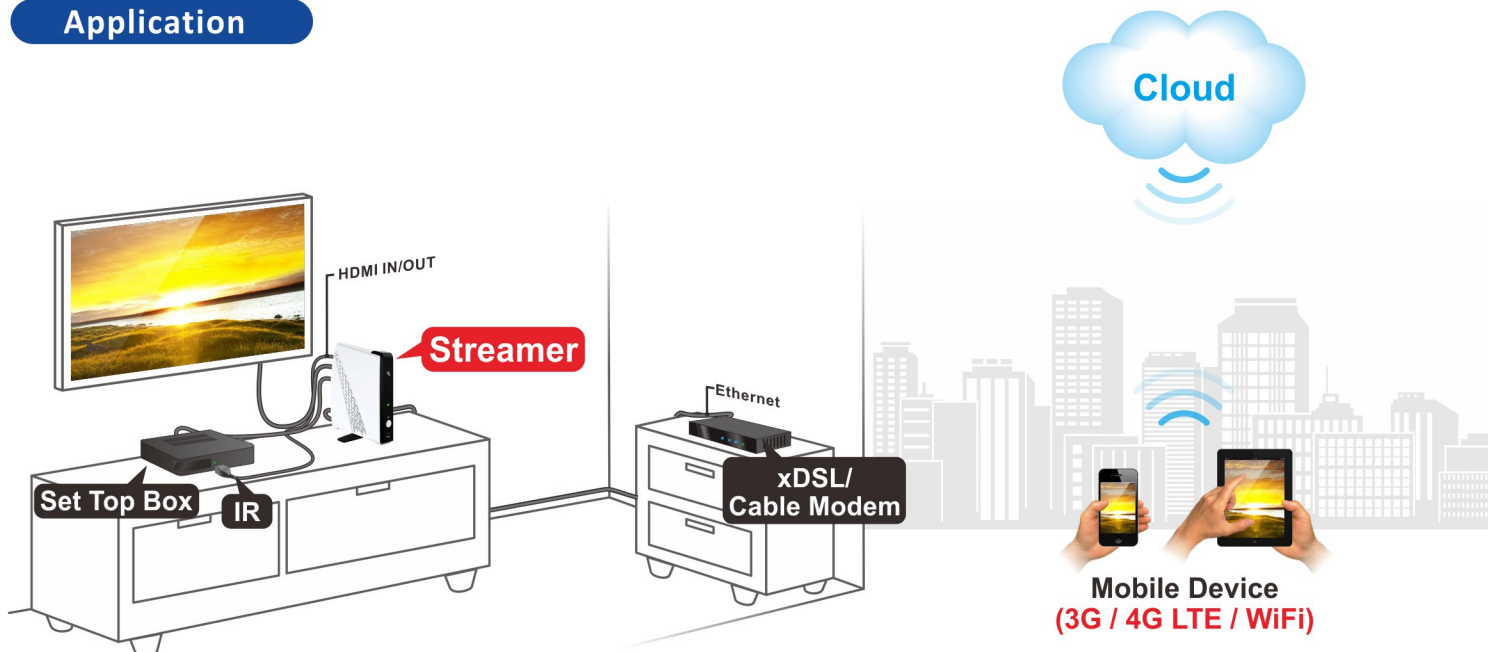

ZIP-930

Introduction

The cloud streamer can simultaneously support real-time transcoding of HD streams. The transcoding technology will generate appropriate video and audio resolution, which makes HD contents can be smoothly played on portable devices. In addition, with secured encryption technology and customized application, users can use their portable devices to watch programs via 3G/4G LTE/WiFi. Moreover, the cloud steamer has implemented A/V on cloud feature; therefore, this entire system achieves the goal of TV reception anywhere.

Application

Address: 2, Wen-Hua Road, Hsinchu Industrial Park, Hsinchu Hsien 303, Taiwan
